ROLLTECH

CHROMATECH

The Stainless Steel Spacer Bar

Chromatech spacer bars provide all thermal advantages with the proven qualities of metallic spacers. 25 to 40% less heat loss in the edge area is the result of lower heat conductivity and reduced wall thickness. Chromatech spacers already now fulfil the new and tightened heat insulation standards in Germany.

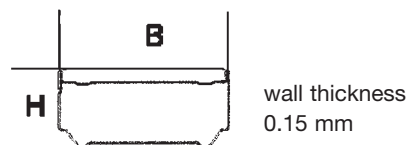

Suitable for processing on automatic bending machines. Spacers for popular cavities, straight connectors and corner keys can be delivered ex stock.

Painting on the visible surface in all RAL- and NCS-colours is possible on request.

Packaging (metre per unit) Length 6.000 mm	Cavity	B in mm	H in mm	Stillage (container)	Carton
	8	7.5	6.5	14.004	1.260
	10	9.5	6.5	12.672	960
	12	11.5	6.5	10.368	768
	14	13.5	6.5	9.216	672
	15	14.5	6.5	8.448	576
	16	15.5	6.5	8.064	576
	18	17.5	6.5	7.296	480
	20	19.5	6.5	6.144	480
	24	23.5	6.5	5.376	384

CHROMATECH PLUS

The Stainless Steel Spacer Bar

Chromatech plus spacer bars provide all thermal advantages with the proven qualities of metallic spacers.

28 to 50% less heat loss in the edge area is the result of lower heat conductivity and reduced wall thickness.

Suitable for processing on automatic bending machines. Spacers for popular cavities, straight connectors and corner keys can be delivered ex stock.

Painting on the visible surface in all RAL- and NCS-colours is possible on request.

Packaging (metre per unit) Length 6.000 mm	Cavity	B in mm	H in mm	Stillage (container)	Carton
	10	9.5	7.0	14.256	1.080
	12	11.5	7.0	11.664	864
	14	13.5	7.0	10.368	756
	15	14.5	7.0	9.504	648
